## Supporting the Initiative

OI Systems, Inc. understands that continued support and maintenance of E-Learning systems can be challenging. The ability for organizations to retain a cadre of reliable and experienced staff, as well as maintaining other resources that are capable of sustaining the maximum performance of its E-learning system, can be a costly and difficult task.

OI Systems can assist in providing variable resources as needed in order to sustain the long-term success of your organization's E-Learning program.

OI Systems has developed an extended enterprise with other organizations that can provide the necessary staff, courseware and other key components needed to maintain an effective and up-to-date E-Learning system.

We are committed to providing a value to our clients. That is why we provide additional resources that will add to the effectiveness of the services we can provide. By reducing costs involved in our Resource Augmentation, OI Systems can increase your organization's return on its investment (ROI).

By providing resources that immediately impact your E-Learning capabilities, your organization can be assured that it will continue to offer the best E-Learning system now and in the future.

## Other Services

OI Systems provides value-added services that can be combined to create an effective approach to any E-Learning or ICT project.

They include:

- **Methodologies**
- **Development of Institutional Policies and Training**
- **Technology Assessment and ICT Strategy**
- **Design and Build Out**
